Personal Statement

The John F. Barnes' Myofascial Release Approach ® consists of the gentle application of sustained pressure into fascial restrictions within the body, which has allowed me to successfully treat thousands of patients over the past 52 years as a self-employed physical therapist and owner/operator of two Myofascial Release Treatment Centers, which currently employs 20 therapists and office staff between both treatment centers. Myofascial Release Seminars presents approximately 90 seminars per calendar year employing sub-contractors to teach my Approach. I have developed two treatment programs, Therapy for the Therapist and Comprehensive Intensive Treatment Program for patients to receive comprehensive delivery of the highest quality of care.
